(54) METHOD AND SYSTEM FOR PROVIDING EFFECTIVE INFORMATION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an effective information providing system, with which the composer and user of contents can flexibly select a display format.

SOLUTION: This system is composed of plural information providing servers 2, repetition center 4 connected through a computer network 1 to these information providing servers 2, plural user terminals 5 connected through the repetition center to the computer network, and contents server 3. The contents server 3 downloads effective information to the user terminals 5. The relay center 4 has script adding means 14 and 24 for acquiring the effective information from the contents server 3, and adding scripts describing a procedure for displaying it for the user terminals to information contents. When the terminal user 5 acquires the information contents, according to the script added to these information contents, the information display program of the user terminal 5 executes the acquisition of effective information from the contents server 3 and display onto the user terminal 5.
